

- Our patients need reliable clinical education to safely and effectively manage their health, illnesses and convalescence. The Hospital Online Patient Education System provided a 4-channel closed circuit TV that will enable us to customize educational and informational programming to suit our patients needs.
- Technology is now available that enables physicians and nurses to monitor key vital signs through a single digitized monitor called Dynamic Vital Signs Monitor.
- The hospital wishes to install an electric chart and tracking system designed to improve patient service by facilitating document flow and tracking in the Emergency Department.
